Oferta de empleo para contrato de gestor para proyecto europeo coordinado desde el IAS

The Institute for Sustainable Agriculture is looking for a candidate for a full time position for a 4-year contract as project manager for an H2020 project which will start in September 2018.

The project: “Soil Hydrology research platform underpinning innovation to manage water scarcity in European and Chinese cropping systems” is a project with nineteen partners between the EU and China, and is aimed to optimize the use of soil and water resource while increasing productivity in key agricultural systems in these regions. It will be coordinated by the Institute for Sustainable Agriculture (IAS-CSIC), located in Cordoba (Southern Spain). IAS-CSIC is one of the leading institutes of agricultural research in Spain, with a large network of international collaborations.

The project is looking for a candidate to be based in Cordoba with the duties of providing support to the project leading the project office (which will lead non-technical matters) and also support to the data management, and dissemination and coordination activities among the partners.

**Experience in administrative support of research projects and fluency in English is required.** Other skills that will be valued will be some knowledge of Chinese and on data management for scientific repositories.

The official selection process will start on September 1st with incorporation as soon as this process is completed, but the candidate needs to be included in the CSIC hiring electronic site during Spring 2018.

For more information please contact as soon as possible with Dr. José A. Gómez (joseagomez@ias.csic.es).
